EXPERIENCE

Nov 2017 - Present

SENIOR WEB DEVELOPER

iPlex Pvt. Ltd

iPlex is a top-ranked digital agency backed by the best designers, developers & Marketers in United States (Chicago). iPlex creates leading-edge software, web apps & digital marketing strategies, making businesses grow into industry leaders. I joined the company in the capacity of Technical Lead. On any given day, I was responsible for:

- AngularJS / React&Redux architecture with Node.js backend.
- Converting design into real life UI pages by developing modern, fully responsive using HTML5, CSS3, Sass, Less, Bootstrap, Moment.js and Webpack.
- Focusing on layouts that are cross-browser compatible & supported by all the major browsers (Safari, Chrome, Firefox, and IE) across devices.
- Extensively use GIT for version controlling and regularly pushing code to GitHub/TFS
- Following agile software development process by interacting with testing team, scrum master and business analysts for fixing the issues.

Sept 2013 - Oct 2017

SENIOR UI ENGINEER

LogicGates

Joined LogicGates as a remote contractor content publisher and front-end developer. Updated existing pages in DigitalRiver using advanced Javascript and HTML/CSS with integration of Adobe Test&Target on e-commerce website for conversion rate and user behavior. Implemented google analytics on the site to track user clicks. Worked with the development team as a Sr. UI Developer. Mainly worked on Adobe CQ5/AEM to create responsive components to facilitate publishing team to update/add content to site. Integrated ReactJS to AEM framework, retrieving products' data using REST APIs and update UI DOM based on user interaction with the help of advanced HTML/SASS.

Oct 2012 - Aug 2013

SENIOR SOFTWARE DEVELOPER

iPlex Pvt. Ltd

Designed and developed web pages using DHTML, CSS3, Ajax, Bootstrap, PHP and jQuery. All of which is based on the W3C and Web standards. Created the UI interface using JavaScript, jQuery and CSS3. Worked on application development using HTML/CSS, Javascript and YiiFramework. Concrete knowledge of jQuery and Ajax that make websites more appealing and user friendly. Created bunch of web applications using different frameworks like Codeigniter, YiiFramework with Bootstrap. Implemented and tested the enterprise application with jQuery, and SpringMVC. Implemented the Drag and Drop functionality using jQuery framework.

Mar 2011 - Aug 2012

SOFTWARE ENGINEER

eVision Software

Joined eVision a sister company of well-known Auto company AutoCraft Pak as senior Software engineer to convert excel based shipping system to real life web application globally accessible. On the given day, I was responsible for:

- Created wireframes and designs as per company's requirement.
- Converted design to responsive layouts for all three break points.
- Developed front/back end dynamic pages using PHP open source, AJAX, Javascript, jQuery, HTML/CSS.
- Wrote optimized code to retrieve 100K plus records from DB with quick response.
- Created data import modules to import existing excel based data to web application and saving all data into DB.
- Continuously communicated with Japanese Shipping team to thoroughly test the system on old and new available data.
- Created a secure and sign in free pages for company owner to view important daily, weekly and monthly reports regarding company profit/loss.
