WORK HISTORY

Front-End Developer

eVision Software, Rawalpindi,

Pakistan March 2013 - Sep 2014

- Developed W3C-compliant websites from layered PSDs utilizing XHTML, CSS, and jQuery/JavaScript combined with an in-house developed CMS.
- Wrote CSS following BEM (block, element, modifier) standards.
- Developed the HTML and CSS coding of the front-end interfaces; including cross-browser support and unit testing to ensure quality work.
- Took Photoshop /Illustrator designs and hand-coded the XHTML, CSS (with a helping hand from Sass), and JavaScript/jQuery.

Senior Front-End Developer

iPlex Pvt Ltd, Rawalpindi , Pakistan

May 2015 - Present

- Developed W3C-compliant websites from a layered PSD; utilizing XHTML, CSS, and jQuery/JavaScript combined with an in-house developed CMS.
- Optimized application for maximum speed and scalability.
- Used Sass to style elements for compatibility and adherence to client style and design. promotions.
- Created and implemented a custom CSS grid system, with CSS media queries for mobile responsiveness.

FREELANCE PROJECTS

Jurassic Fruit (Development)

https://nomiullah.github.io/projects/Jurassic/html/

My job was to create the website from scratch; from PSD to HTML using Bootstrap, jQuery plugins like Parallax WOW.js. I was also responsible for making it responsive across all devices and platforms.

Kimono LLC (Development)

https://nomiullah.github.io/projects/kimono/index.html

I converted PSDs into hand-coded HTML/CSS. I used UI frameworks: Bootstrap 3.0, Font Awesome 3.0, and Google Analytics.

Making the site responsive and friendlier to smaller devices was one of my main tasks as well as improving the performance. I also fixed front-end bugs (HTML, CSS, JavaScript errors (jQuery), and conducted unit testing

Liquid 9 (Development)

http://liquid9.tv/

I was responsible for the HTML, CSS3, and the design plus some JavaScript/jQuery. I created clean, maintainable, cross-browser compatible code from the mockups. I also developed an HTML5 cross-browser compatible framework for the courses to run on mobile and modern browsers.

BAUER ORTHODONTIC

http://www.bauerortho.com/

Dr. Matthew Bauer is dedicated to the highest level of orthodontic care.My job was to create the website from scratch; Illustrator to HTML using Bootstrap, and make it a responsive across all devices and platforms

Calvary Baptist Church (Development)

https://nomiullah.github.io/projects/calvary/

I developed a static website with responsive capabilities based off a single mock-up vision in 5 days. I used UI frameworks: Bootstrap 3.0, Font Awesome 3.0, Google Analytics.

Token.io (Development)

http://developer.token.io/

My responsibilities in this project were the following:
- Creating the developer landing page from the Sketch file.
- Adding style to the existing documentation page which was already done in Slate, Ruby, and Python

EDUCATION

Bachelor's degree in Computer Science

2015 - 2019

Foundation University Rawalpindi Campus (FURC)- Rawalpindi, Pakistan
